

ÉTERNELLE
JUST FEEL IT

ABOUT

Éternelle is a unique brand introduced by Global Beauti; a British based company specializing in beauty implements.

Éternelle is developed with a passion and aspiration to meet world class quality. The products under this brand are developed from the hand-picked expertise across the world. All products are made of professional quality and highest precision and presented with classy look. Éternelle entertains the Beauty lovers and quality savvy generation. It aspires to be the preferred treasure for Beauty industry gurus and experts, iconic presence in world class spas and salons and landmark for floors of world renowned beauty stores.

It is launched in Professional Beauty 2012 and was one of the hottest item for the show. Many professionals including some celebrity makeup artists loved the products.

Éternelle is evolved from the heritage of beauty and reinvigorate the ideology of beauty from what we see to what we sense. It is an experience, and aura of feeling. This brand is launched after a thorough research on beauty and narrates a story from the conception of grooming and beauty from Egyptians in 10,000 BC. Beauty savviness and grooming is evident from rhetoric of many civilisations be it Egyptians, Greeks, or Arabs. The use of Neolithic ointments to groom, beauty tools such as applicators to dispense kohl as eyeliner or keeping crafted mirrors inhabit historically from all cultures.

It is essential in this era that we keep in mind the grooming is not specific to gender. It is for everyone, and for all skins. It is a part of our routine and attire rather than a special occasion, latest fashion or hot trendy looks. This brand is developed keeping our needs and lifestyle in mind.

Éternelle can be a gift for someone special, a tool to enhance magic of beauty gurus or for personal use. Each unit is packed to keep the item safe and secure in a classy looking packaging. The main categories Éternelle is serving are Eyes, Face, Hair, Hand and feet.

ÉTE 3236

Eye Brow Tweezer, Slant, 9.5cm

Japanese Stainless Steel

Acid-proof, antimagnetic and rustproof

Life Time Guarantee

Éternelle Tweezers are one of the best tweezers available in the market that are ideal for personal or professional use. Éternelle Slant tweezers are made with high quality Japanese stainless steel and come with life time guarantee.

Éternelle tweezers are perfectly aligned and hand finished with very precise tip which allows gripping stray hair. Because they are light weight, they reduce tension on your fingers. It is the choice of Celebrity makeup artists and those who need a perfect tool for tweezing. As they are made with high quality stainless steel they can be sterilised without any problem.

Always tweezer in the direction of hair growth after a warm shower or use warm cloth to open pores. Make sure you are in a well lit room and brush your brows to check any stray hair.

Éte 2589

Éternelle Glass Nail File 135mm.

Made in EU

Life Time Guarantee

Comes with protective case

Éternelle Premium Glass Nail File is recommended for both natural and artificial nails. It is an ideal tool for both home and professional use.

This is a unique product available in the market as it never wears out. In ordinary glass files the filing surface is made of grinding grains that are attached to the base. These grains fall away after frequent use and file goes blunt. The filing surface of our nail files is created right out of the glass through a chemical reaction. It forms uniform microscopic spikes that are evenly distributed over the surface. That is why we give life time guarantee as they never worn out.

Our Glass Nail files go through hardening process that increases their mechanical resistance. The laboratory tests proved that the flex strength of our hardened glass nail file is much higher than normal non hardened nail files.

To use our glass nail file already prepare your nails first for filing. Soak your fingertips in warm water before use. Make sure all nails are at an equal length by using nail nipper. Always file in one direction and while filing avoid the corner edges of each nail. Continue filing to achieve your desired results. Repeat these steps once a week to maintain healthy and beautiful nails. These nail files can also be ideal for artificial nails but make sure the file is regularly dipped into water to reduce the friction on the gel or artificial nail.

Our Glass Nail files are not porous so cannot absorb water and does not form any environment for bacterial or fungal infections. Also our nail files are disinfected, boiled or sterilised. They never suffer corrosion even in aggressive conditions and always retain their properties.

These glass nail files are ideal for professional use as the excellent grinding ensures quality and nail treatment and sterilisation eliminates the risk of spreading nail infections among customers. Also they can be sterilised to use on next customer and it bring more satisfied customers.
