ABOUT US:

Global Medical is a division of global Linkx Ltd. It covers a wide variety of medical disciplines including single use, reusable surgical, dental and podiatry instruments. We are committed to provide best quality products and it is reflected by our ISO 9001 and ISO 13485 certificates and compliance to Medical Devices standard 93/42/EEC Annex V. This entitles us to use CE 0120 marking on our disposable range.

Global medical is offering a range of health and well-being products. We are NHS Approved supplier and provide surgical instruments to many acute and primary care trusts from many years. Our portfolio of clients includes GP surgeries, NHS and private hospitals, Podiatry clinics, Dentists, specialist nurses and consultants.

Glosyn is launched in recognition of the growing need of single use surgical instruments in healthcare industry. There is significant evidence and recommendations from professional institutes to use single use instruments in order to minimise the risk of cross contamination or instrument led infections. Single use instruments also eliminate the cost of sterilisation, repairing and maintenance.

Following our quality charter best quality raw material is sourced and tested before going to production. The units are produced following international quality standards. In the next stage, each unit is cleaned and packed in British Clean rooms. After sterilisation units go through final quality control before they are shelved. Full instructions are provided for the use of our products and disposal. Each product comes with traceability mark. We continuously Audit our production cycles and take into account any feedback received from the customers.

BENEFITS OF USING SINGLE USE SURGICAL INSTRUMENTS:

- Improved clinical management
- Minimise the risk of cross infections
- No worry about replacement of damaged instruments
- Peace of mind
- No repairing cost
- Ideal for high risk procedures
- Ease of use for sterilised packs
- Ease of traceability
- Easy to order and store
- Easy to keep and maintain stock

OUR PRODUCT/SERVICES RANGE

Single use surgical Instruments and procedure packs

Re-useable Instruments

Single use Dental Instruments and procedure packs

Single use podiatry instruments and procedure packs

Surgical/ Podiatry Supplements
Bespoke procedure packs

Training and product demonstrations

Product literature along with wall charts and CD's.

Advice and Educational Support (CPD)

WHY US

Guaranteed next day delivery with free tracking

Full refund if not satisfied

No Minimum order

24 hours ordering service available

Free inventory management

Customise your own set

Flexible 59 days account available for NHS Customers

After sale service

Majority of our instruments are available via NHS Supply Chain.

Free Delivery in Great Britain on order over £75.00

Education, training and free product demonstrations

Discount vouchers available on bulk orders

No Obligation quote

Trial products available

Agreed discounts for buying groups, consortiums and Distributors.

Ethically compliant (LSAS) supplier

KEY AREAS WE COVER

GP Surgeries: Our products include a range of routinely used instruments in GP surgeries to perform minor procedures. We also provide bespoke procedure packs to GP surgeries for special requirements. Disposable instruments carton size varies from 20 to 100 instruments.

Podiatry: We provide complete packs used in any podiatry procedure. These packs can be demonstrated free if required. A large variety of nippers are also available. All instruments are available in singles or packs.

Sexual Health: We provide a complete solution for all Gynae and Sexual Health related procedures. Various procedure packs are available including IUD's.

ENT: Our instruments provide help in dealing with disorders in head and neck. Our wide range covers instruments from mirrors and forceps to speculums and suction tubes.

Dentistry: Many dentists prefer to use single use instruments to minimise clinical risk. Our dental examination kits are ideal for dental practices looking for quality instruments at affordable prices.

A high-angle, close-up photograph of several surgeons in a sterile operating room. They are wearing white surgical gowns, blue bouffant hairnets, and white surgical masks. One surgeon in the center is wearing clear safety goggles with a blue frame. They are all focused on a task, with their hands in blue nitrile gloves. Surgical instruments, including forceps and scissors, are visible in the foreground. The background is bright and out of focus, suggesting a well-lit surgical suite.

Unit Qty: **50**

A collection of surgical instruments is arranged on a light blue surface. In the center is a stainless steel bowl. To the left, a pair of long-handled forceps with circular handles is positioned diagonally. Below the bowl, a scalpel with a textured handle and a curved blade lies horizontally. To the right of the bowl, another pair of forceps with circular handles is visible. In the bottom right corner, a cylindrical mesh strainer is partially shown. A thin wire with a small rectangular component at one end lies in the lower left area. The text "PODIATRY PROCEDURE PACKS" is overlaid in a bold, dark blue font across the middle of the image.
